Make your own granola bars and snacks W	No single use plastics for 2 days! A	Eat a garbage free lunch S	Use a reusable water bottle T	I reduced waste by... E	Turn off the tap when brushing your teeth R

ENERGY CAMPAIGN **SAVE ENERGY!** Bingo

Fill the card, or spell **SAVE, WATER, WASTE**

The challenge is to do one or more of the actions on the bingo card.

To save energy, or water, or reduce waste, we can take action in two ways:

- Changing our **behaviour**, or the habits of how we use energy and water and produce waste. For example, turning out lights when we leave a room.
- Changing **technology**, or the stuff we use to save energy and water and reduce waste. For example, replacing old lighting with energy efficient LED light bulbs.

What to do

1. Print the bingo card. (print 2-sided to include ideas for how to use the card on the back) Or, copy the bingo card onto paper, or make up your own card using the action ideas.

Note: You may not be able to do some of these actions now because of COVID-19, so just change the action you can't do, for one that you can do safely.

2. Choose a time frame for your challenge. One week, one month, etc.
3. Take action:
 - Do as many conservation actions as possible in the time frame,
 - Try to get a black out – do every activity to fill the whole card,
 - Do the actions that spell out “SAVE”, “WATER”, or “WASTE”,
 - Fill more than one card, or
 - Keep track of how many times you do each action on the same card.
4. Share with your classmates. You can do that by:
 - Telling your teacher when you talk to them, or
 - Taking photos of you or your family doing the actions and sharing them with your teacher and classmates. (e.g. if you and your class are on a platform like google classroom, or can share on Instagram or twitter, share your actions. #saveenergy #SASF #skenvsociety)
