EARTH Hour
Day

25 Acts of Energy Conservation

is a K – 12, province-wide action campaign that promotes energy conservation all school year, culminating in a month of daily activities between Earth Hour and Earth Day.

Here's how your school can be involved.

Take action on energy, water or waste

This school year, choose an action project that conserves energy or water, or reduces waste. Learn about it, take action on it, and document your journey.

Tell us what you did

Find a creative way to tell us what you did and what you accomplished. There are lots of choices, like a video, power point presentation, a blog or webpage, or a PDF of photos and description.

Celebrate Earth Hour to Earth Day

Between March 23rd and April 24th, 2015, use our calendar of campaign ideas, lessons and daily announcements to make the month a celebration of how to care for our environment.

2 entries will be chosen for prizes of \$1,000. 10 entries will be chosen for prizes of \$200.

A Bit More About Choosing Your Campaign

Your **25 Acts of Energy Conservation** project can be any of the following:

- One campaign which students, your class or school do to conserve energy or water, or reduce waste. It can be an inquiry and action project done anytime in the 2014 – 15 school year. Document what you did, and what you accomplished.
- Do **one** or **many** of the daily or weekly acts of conservation from our calendar of ideas. Be sure to take some video/photos of spirit days of your acts of conservation. ([link to calendar here](#))
- Use our daily announcements to promote saving energy, water and reducing waste in your school and at home. Challenge each other, or another school to perform **25 Acts of Energy Conservation** in the month between Earth Hour and Earth Day (March 23rd to April 24th). ([link to announcements here](#))
- Inquiry projects about renewable energy, local foods or any other environmental projects you might be working on are fine - if they have an action component. Learn about the issues, and then choose an action that helps! Remember to document your journey.
- To be considered for prizes, entries (including all descriptive materials like videos, PDF's or other) must be submitted by the final date of the contest, April 24th, 2015. ([link to registration and rules here](#))
