Buildings that are operated with efficiency in mind operate more efficiently.

- "The course offered extremely applicable solutions that can be put into action right away. I think there are some easy solutions that Building Operators may not be aware of that can increase energy efficiency while maintaining personal comfort of occupants and saving money."
- "Building Operator Training gives a good base of knowledge of lighting, heating, and water consumption."
- "This course was so helpful for day-to-day operations. I recommend it for all facility personnel."
- "I would definitely take this course again down the road as it was very helpful. My supervisor expressed interest in attending as well."

A Better Planet Begins in the Workplace

BUILDING OPERATOR TRAINING

The Saskatchewan Environmental Society's Building Operator Training (BOT) program is designed to introduce custodians and building operators to energy conservation principles, new technologies, and facility retrofits that will save energy and money. Instructed by experienced professionals, including SES's Energy Conservation Engineer, participants learn about how both equipment and operational changes can reduce consumption and improve efficiency. All participants will receive a certificate of completion, and a workbook to apply the concepts to their facility.

ABOUT US

The Saskatchewan Environmental Society (SES) is a non-profit, registered charity that has been working on pressing environmental issues in our province since 1970. We are committed to supporting sustainable living and sustainable resource use, and our mandate is to work towards a world in which all needs can be met in sustainable ways. Many of our programs help citizens conserve precious resources such as energy and water in their homes, businesses, institutions, and organizations. SES has established a reputation for sound science, good management, civility, and an ability to work collaboratively with others.

Our work in Saskatchewan is carried out in Treaties 2, 4, 5, 6, 8, 10, and our office is located in Saskatoon on Treaty 6 territory, the traditional land of Cree peoples and homeland of the Métis Nation.

The Benefits

Save significant money now & into the future.

Improve the comfort & function of your building(s).
